Operation contracts	1
Classes	1
Relationships	0

1.1 Domain

1.1.1 Glossary

Term	Definition	Rules
Report	A generated project handoff document.	Must preserve project intent and implementation constraints.

1.2 Analysis

1.2.1 Supplementary Specification

Category	Requirement	Description
reliability	Recoverable export	Documentation generation should not depend on diagram rendering.

1.2.2 Use Cases

Use Case	Primary Actor	Steps	Preconditions	Postconditions
ExportDocumentation	Developer	1	1	1

1.2.2.1 EXPORTDOCUMENTATION

Description: Developer generates a report for implementation planning.

Actor: Developer

Preconditions: - Project model is valid

Flow of Events: 1. generateReport - format: pdf

Postconditions: - Report artifact is written

1.2.3 System Operations

Operation	Actor	Use Case
generateReport(format: string)	Developer	ExportDocumentation

1.2.3.1 GENERATEREPORT(FORMAT: STRING)

Actor: Developer

Use Case: ExportDocumentation

Preconditions: - Project model is valid

Postconditions: - Report artifact is written

1.2.4 Operation Contracts

1.2.4.1 GENERATEREPORT(FORMAT)

Use Case: ExportDocumentation

Preconditions: - Project model is valid

Postconditions: - Markdown report is generated - PDF report uses configured CSS when requested

1.3 Design

1.3.1 Classes

Class	Attributes	Methods	Responsibility Signal
ReportJob	1	1	1 operations

1.3.1.1 CLASS: REPORTJOB

1.3.1.1.1 Attributes

Attribute	Type	Visibility	Metadata
format	string	unspecified	-

1.4 Implementation

1.4.1 Class Operations

1.4.1.1 CLASS: REPORTJOB OPERATIONS

Method	Visibility	Effects	Metadata	Pre/Post Conditions
run()	+	-	-	-
